1. Document Header & Governance Information

LISTEN SECTION

Governance Parameter	Reference Details
Lead Consortium Entity	Lwandile Engineering Projects (Pty) Ltd (SMME / Technical Delivery Lead)
Governance & Skills Partner	Inclusive Entrepreneurial Academy (Dr. Palesa Charlotte Felix-Faure, Founder)
Principal / Project Lead	Sipho Wiseman Khuzwayo (Inclusive Legacy Architect / Project Lead)
Academic & Governance Lead	Dr. Palesa Charlotte Felix-Faure (Academic Lead & Skills Transfer Principal)
Target Region	Mpumalanga, South Africa
Submission Date	October 2026
Execution Standard	Scapush Precision Execution Standard
Funding Window	JET Funding Platform — Window 4: Agriculture & Food Systems

2. Executive Summary

LISTEN SECTION

Lwandile Engineering Projects, in strategic partnership with the **Inclusive Entrepreneurial Academy** (founded by Dr. Palesa Charlotte Felix-Faure), formally submits this Expression of Interest (EOI) under Window 4 of the Just Energy Transition (JET) Funding Platform. Recognizing that JET funding strictly evaluates registered, high-capacity institutional partnerships rather than standalone entities, our consortium delivers an end-to-end framework combining rigorous engineering execution with accredited institutional governance and long-term skills transfer.

As coal-fired power infrastructure transitions out of service across Mpumalanga, vulnerable community ecosystems face critical economic challenges. Our consortium deploys an integrated bio-solar and circular agrifood model combining agrivoltaics and controlled-environment hydroponics with an organic waste-to-value biogas and composting pipeline.

Under the stewardship of Dr. Palesa Charlotte Felix-Faure and the Inclusive Entrepreneurial Academy, the initiative incorporates structured governance, accredited entrepreneurship curricula, and sustainable community skills transfer. Executed according to the Scapush Precision Execution Standard, this alliance guarantees institutional integrity, SARS and regulatory compliance, and measurable socioeconomic impact.

Agrivoltaics	**Hydroponics**	**Academy-Led**	**36 Months**
CLEAN ENERGY INTEGRATION	CONTROLLED AGRICULTURE	SKILLS & GOVERNANCE PARTNER	IMPLEMENTATION HORIZON

3. Applicant Eligibility & Institutional Governance Matrix

LISTEN SECTION

Compliance & Partner Parameter	Institutional Role / Status	Details & Strategic Value
Lead Execution Entity	Lwandile Engineering Projects (Pty) Ltd	100% Black-owned South African private enterprise; technical engineering and infrastructure deployment lead.
Governance & Skills Partner	Inclusive Entrepreneurial Academy	Founded by Dr. Palesa Charlotte Felix-Faure; drives institutional governance, curriculum accreditation, and social impact tracking.
Tax & Legal Compliance	Fully Compliant / SARS Good Standing	Registered South African entities in full regulatory compliance with active SARS tax PINs.
Geographic Target	Mpumalanga Priority Zone	Direct deployment within coal-transition communities to stimulate sustainable non-fossil employment.
JET Alignment	Institutional Strategy Fit	Substantial multi-stakeholder partnership structured for direct grant readiness and governance compliance.

4. Key Focus Areas & Technical Scope

LISTEN SECTION

4.1 Climate-Smart & Controlled-Environment Agriculture (Hydroponics & Agrivoltaics)

- **Agrivoltaic Integration:** Dual-use land development deploying elevated solar PV structures over active crop production areas, optimizing land efficiency and providing microclimate shading.
- **Controlled-Environment Hydroponics:** Closed-loop nutrient film technique (NFT) and deep water culture (DWC) systems reducing water usage by up to 90% relative to traditional open-field farming.
- **Resilient Crop Selection:** Prioritizing high-value leafy greens, tomatoes, and regional staple crops tailored for local supply chains and municipal produce markets.

4.2 Agrifood-Related Organic Waste-to-Value (Composting & Biogas)

- **Anaerobic Digestion (Biogas):** Capture and conversion of agricultural residues and food waste into clean biogas for farm-level thermal and electrical energy requirements.

- **Commercial Composting:** Processing digestate and organic bypass streams into high-grade organic bio-fertilizers to rehabilitate degraded soil in surrounding farming communities.
- **Circular Resource Loops:** Complete recovery of water, nutrients, and energy within the farm boundary to minimize external inputs and operational expenditure.

4.3 Governance, Skills Transfer & Institutional Capacity Building

- **Inclusive Entrepreneurial Academy Modules:** Structured capacity-building and business incubators designed by Dr. Palesa Charlotte Felix-Faure to build sustainable local green enterprises.
- **Accredited Technical Training:** Comprehensive workforce upskilling covering renewable energy maintenance, anaerobic digester management, and hydroponic operations.
- **Community Food Hubs & Outgrowers:** Establishing localized aggregation centers and providing certified outgrower support to integrate smallholders into commercial value chains.

5. Budget & Funding Request Structure

LISTEN SECTION

The proposed initiative spans a 36-month implementation lifecycle, with funding phased across critical execution milestones. The Lwandile Engineering & Inclusive Entrepreneurial Academy consortium seeks catalytic financing within the JET Window 4 framework (R500,000 – R20,000,000 scaling band).

Phase	Duration	Core Focus & Deliverables	Estimated Allocation (%)
Phase I: Feasibility & Governance Setup	Months 1–6	Detailed engineering design, EIA, Academy governance charter, stakeholder alignment.	15%
Phase II: Capital Infrastructure & Facilities	Months 7–18	Agrivoltaic installation, hydroponic tunnels, anaerobic digester, and Academy training facility setup.	50%
Phase III: Operational Ramp-Up & Academy Rollout	Months 19–27	First crop cycles, biogas commissioning, onboarding of initial student & enterprise cohorts.	20%
Phase IV: Enterprise Scaling & Ecosystem Integration	Months 28–36	Outgrower expansion, commercial market distribution, full circular bioeconomy integration.	15%
TOTAL PROJECT TIMELINE	**36 Months**	**Full Bio-Solar, Food Security & Academy-Led Governance Ecosystem Deployment**	**100%**

CONSORTIUM GOVERNANCE & STRATEGY

Institutional Governance: Overseen joint-venture escrow and financial auditing protocols led by Dr. Palesa Charlotte Felix-Faure ensuring zero capital leakage and complete alignment with JET PMU standards.

Execution Oversight: Engineering and operational milestones executed strictly in accordance with the Scapush Precision Execution Standard.

6. Execution Framework & Next Steps

LISTEN SECTION

The consortium will execute this project through a Joint Project Steering Committee (JPSC) co-chaired by Sipho Wiseman Khuzwayo and Dr. Palesa Charlotte Felix-Faure, incorporating technical leads, municipal representatives, and local community leadership to maintain transparent oversight and accountability.

Key Implementation Milestones

- **Q4 2026:** Execution of formal Joint Venture agreement and JET platform inception workshops.
- **Q1 2027:** Geotechnical evaluations, environmental authorizations, and Academy curriculum finalization.
- **Q3 2027:** Construction of bio-solar infrastructure and agricultural training facilities.
- **Q1 2028:** Initial agricultural yields, biogas generation, and graduation of first Academy cohort.

Crucial Timeline Alignment

- **EOI Submission Deadline:** Thursday, 5 November 2026.
- **Formal Proposal Submission:** Post-EOI qualification per JET Funding Platform evaluation.
- **Consortium Contacts:** Sipho Wiseman Khuzwayo & Dr. Palesa Charlotte Felix-Faure.
